

// WAP to find the frequency count in a given file.

Lex Program:

```
%{  
  
#include <stdio.h>  
  
#include <stdlib.h>  
  
#define MAX_CHARS 256  
  
int char_count[MAX_CHARS] = {0};  
  
%}  
  
  
%%  
  
  
  
.  
{  
    char_count[(unsigned char)yytext[0]]++;  
}  
  
  
%%  
  
  
  
int main(int argc, char **argv) {  
    FILE *file = fopen(argv[1], "r");  
    yyin = file;  
    yylex();  
  
    // Print character frequencies  
    printf("Character Frequency Count:\n");  
    printf("-----\n");  
  
    for (int i = 0; i < MAX_CHARS; i++) {  
        if (char_count[i] > 0) {  
            if (i == ' ') {  
                printf("' ' : %d\n", char_count[i]);  
            }  
        }  
    }  
}
```

```

        else {

            printf("%c' : %d\n", i, char_count[i]);

        }

    }

}

fclose(file);

return 0;

}

int yywrap() {

    return 1;

}

```
